

## C/EBP- $\beta$ (S229/182) polyclonal antibody

Catalog: BS1037

Host: Rabbit

Reactivity: Human, Mouse, Rat

### BackGround:

C/EBP  $\beta$  is a member of the C/EBP transcription factor family. The C/EBP  $\beta$  gene encodes several isoforms, which have truncated transcription activation domains by the alternative translational initiation at multiple AUG start sites. Initiation of translation at the in-frame AUGs forms four C/EBP  $\beta$  isoforms. C/EBP  $\beta$  is also known as interleukin 6-dependent DNA-binding protein (IL6DBP), liver activator protein (LAP) or liver-enriched transcriptional activator protein transcription factor 5 (TCF5). C/EBP  $\beta$  contributes to the regulation of the acute phase response in hepatocytes. Stat3 has an important function in IL-6-mediated transcription of the C/EBP  $\beta$  gene that has direct implication for acute phase response in liver cells. The 35 kDa C/EBP  $\beta$  form requires phosphorylation for its DNA binding ability, and increased binding of C/EBP  $\beta$  isoforms during acute-phase reaction occurs through its upregulation and structural modification.

### Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

### Molecular Weight:

~ 19, 36, 38 kDa

### Swiss-Prot:

P17676

### Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

IHC: 1:50~1:200

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Specificity:

C/EBP- $\beta$  (S229/182) polyclonal antibody detects endogenous levels of total C/EBP- $\beta$  protein.

### DATA:

Immunohistochemistry (IHC) analyzes of C/EBP- $\beta$  (S229/182) pAb in paraffin-embedded human breast carcinoma tissue at 1:100.

### Note:

For research use only, not for use in diagnostic procedure.
