

# DGK-δ (S66) polyclonal antibody

Catalog: **BS2078**  Host:

Rabbit

Reactivity: Human, Mouse, Rat

# **BackGround:**

Diacylglycerol kinases (DGKs) phosphorylate diacylglycerol (DAG) to produce phosphatidic acid. DAG and phosphatidic acid are lipids that act as second messengers in signaling cascades. DGK-a influences cell activation and secretion of lethal exosomes, which in turn control cell death. DGK-B is abundant in restricted brain regions such as the caudate putamen and olfactory tubercle. DGK-y encodes full-length and truncated transcripts that are present in a range of human tissues, with greatest expression observed in retina. DGK-8 is most abundant in skeletal muscle. DGK-*ɛ* shows specificity for arachidonylcontaining diacylglycerol and is expressed predominantly in testis. DGK- $\theta$  is most abundant in the cerebellum and hippocampus. DGK-1 is present in brain and retina as a predominant transcript of more than 12 kb, including a long 3-prime untranslated region, with additional low abundance transcripts of 9.5 and 7.5 kb. DGK-n is closely related to DGK-\delta. DGK- $\zeta$  is most abundant in brain and muscle. DGKs have structural motifs that play regulatory roles, and these motifs form the basis for dividing the DGKs into five subtypes.

**Product:** 

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

**Molecular Weight:** 

~ 135 kDa

**Swiss-Prot:** 

Q16760

**Purification&Purity:** 

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### **Applications:**

WB: 1:500~1:1000 IHC: 1:50~1:200

### **Bioworld Technology, Inc.**

Add: 1660 South Highway 100, Suite 500 St. Louis Park, MN 55416,USA. Email: info@bioworlde.com Tel: 6123263284 6122933841 Fax:

# IF: 1:50~1:200

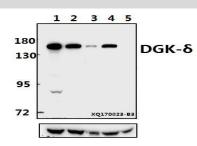

## **Storage&Stability:**

Store at  $4 \, \text{C}$  short term. Aliquot and store at  $-20 \, \text{C}$  long term. Avoid freeze-thaw cycles.

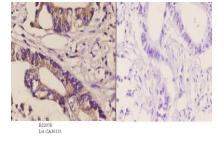

### **Specificity:**

DGK-8 (S66) polyclonal antibody detects endogenous levels of DGK-δ protein.

### **DATA:**

Western blot (WB) analysis of DGK-8 (S66) pAb at 1:500 dilution Lane1:A549 whole cell lysate(40ug) Lane2:Hela whole cell lysate(40ug) Lane3:A2780 whole cell lysate(40ug) Lane4:PC12 whole cell lysate(40ug) Lane5:3T3-L1 whole cell lysate(40ug)

Immunohistochemistry (IHC) analyzes of DGK-δ (S66) pAb in paraffin-embedded human Rectum carcinoma tissue at 1:50.showing cytoplasmic staining. Negative control (the right)Using PBS instead of primary antibody, secondary antibody is Goat Anti-Rabbit IgG-biotin followed by avidin-peroxidase.

#### Note:

For research use only, not for use in diagnostic procedure.
