Dok-6 (G130) polyclonal antibody

Catalog: BS2488 Host: Rabbit Reactivity: Human,Mouse,Rat

BackGround:

The downstream of kinase family (Dok-1-7) are members of a class of “docking” proteins that include the tyrosine kinase substrates IRS-1 and Cas, which contain multiple tyrosine residues and putative SH2 binding sites. Dok-4, Dok-5 and Dok-6 are more similar to each other than to the other Dok family members, and may constitute a sub-family of the DOK genes. Dok-6 is highly expressed in the developing central nervous system. It associates with Ret to transduce Ret-mediated processes such as axonal projection.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

~ 43 kDa

Swiss-Prot:

Q6PKX4

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

IHC: 1:50~1:200

IF: 1:50~1:200

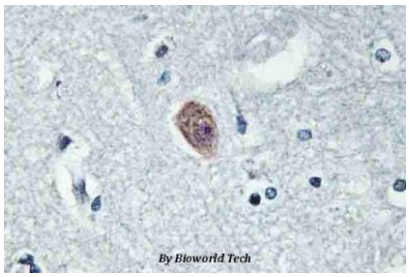
Storage&Stability:

Store at 4℃ short term. Aliquot and store at -20℃ long term. Avoid freeze-thaw cycles.

Specificity:

Dok-6 (G130) polyclonal antibody detects endogenous levels of Dok-6 protein.

DATA:



Immunohistochemistry (IHC) analyzes of Dok-6 (G130) pAb in paraffin-embedded human brain tissue.

Note:

For research use only, not for use in diagnostic procedure.
