

CCL8 polyclonal antibody

Catalog: BS70757

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

This antimicrobial gene is one of several chemokine genes clustered on the q-arm of chromosome 17. Chemokines form a superfamily of secreted proteins involved in immunoregulatory and inflammatory processes. The superfamily is divided into four subfamilies based on the arrangement of N-terminal cysteine residues of the mature peptide. This chemokine is a member of the CC subfamily which is characterized by two adjacent cysteine residues. This cytokine displays chemotactic activity for monocytes, lymphocytes, basophils and eosinophils. By recruiting leukocytes to sites of inflammation this cytokine may contribute to tumor-associated leukocyte infiltration and to the antiviral state against HIV infection.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

~ 11 kDa

Swiss-Prot:

P80075

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB 1:500 - 1:2000

IHC 1:50 - 1:100

IF 1:50 - 1:100

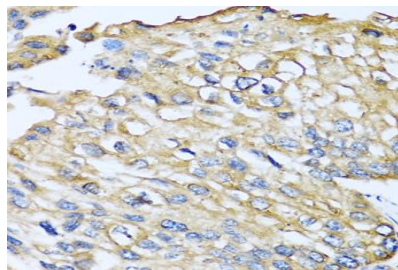

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

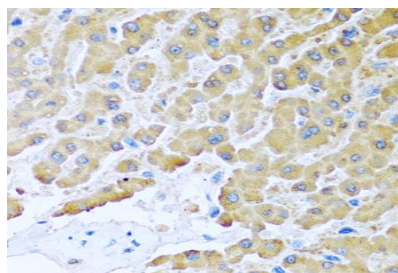

Specificity:

CCL8 polyclonal antibody detects endogenous levels of CCL8 protein.

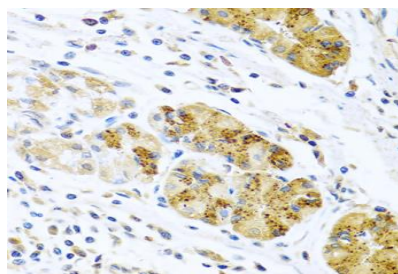

DATA:

Immunohistochemistry of paraffin-embedded human liver using CCL8 antibody at dilution of 1:100 (40x lens).

Immunohistochemistry of paraffin-embedded human prostate cancer using CCL8 antibody at dilution of 1:100 (40x lens).

Immunohistochemistry of paraffin-embedded human stomach using CCL8 antibody at dilution of 1:100 (40x lens).

Note:

For research use only, not for use in diagnostic procedure.
