

MSRB2 polyclonal antibody

Catalog: BS71186

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Methionine-sulfoxide reductase that specifically reduces methionine (R-sulfoxide back to methionine. While in many cases, methionine oxidation is the result of random oxidation following oxidative stress, methionine oxidation is also a post-translational modification that takes place on specific residue. Upon oxidative stress, may play a role in the preservation of mitochondrial integrity by decreasing the intracellular reactive oxygen species build-up through its scavenging role, hence contributing to cell survival and protein maintenance.
