# **CLTB** polyclonal antibody

Catalog: BS71209 Host: Rabbit Reactivity: Human, Mouse, Rat

#### **BackGround:**

Clathrin is a large, soluble protein composed of heavy and light chains. It functions as the main structural component of the lattice-type cytoplasmic face of coated pits and vesicles which entrap specific macromolecules during receptor-mediated endocytosis. This gene encodes one of two clathrin light chain proteins which are believed to function as regulatory elements. Alternative splicing results in multiple transcript variants.
