

## KIR2.3 (E285) polyclonal antibody

Catalog: BS9176

Host: Rabbit

Reactivity: Human, Mouse, Rat

### BackGround:

The KIR2 subunit family includes 2.1, 2.2, 2.3 and 2.4. Unlike G-protein coupled KIR3 subunits, KIR2.1 requires both phosphorylation by PKA and ATP hydrolysis for functional activity. KIR2.1 is expressed in the superior and inferior collicula and the pontine region of the brain, where it moderates synaptic transmission, like many other potassium channels. In the placenta, KIR2.1 is expressed throughout gestation in cytotrophoblast cells. In the kidney, KIR2.1 colocalizes with KIR5.1 in the proximal tubule. KIR2.1, 2.2 and 2.3 associate with the membrane-associated guanylate kinase synapse-associated protein 97 in the cerebellum and heart. Phosphorylation of KIR2.2 by protein kinase A inhibits the associates with SAP97. Arachidonic acid increases current amplitude in KIR2.3 activity but does not affect the activity of KIR2.1, 2.2 or 2.4.

### Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

### Molecular Weight:

~ 50 kDa

### Swiss-Prot:

P48050

### Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB: 1:500~1:1000

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Specificity:

KIR2.3 (E285) polyclonal antibody detects endogenous levels of KIR2.3 protein.

### DATA:

Western blot (WB) analysis of KIR2.3 (E285) pAb at 1:1000 dilution

Lane1:U-87MG whole cell lysate(40ug)

Lane2:The Heart tissue lysate of Mouse(40ug)

Lane3:The Heart tissue lysate of Rat(40ug)

Lane4:HEK293T whole cell lysate(40ug)

### Note:

For research use only, not for use in diagnostic procedure.
