Recombinant MIP-3 α /CCL20, Rat

Catalog Number: BK0324-5 μ g

Source: HEK 293

Quantity: 5 μ g

Description:

Macrophage Inflammatory Protein-3 (MIP-3 α), also known as chemokine (C-C motif) ligand 20 (CCL20) or liver activation regulated chemokine (LARC), is a small cytokine belonging to the CC chemokine family. It is strongly chemotactic for lymphocytes and weakly attracts neutrophils. MIP-3 α is implicated in the formation and function of mucosal lymphoid tissues via chemoattraction of lymphocytes and dendritic cells toward the epithelial cells surrounding these tissues. MIP-3 α is expressed in the liver, lymph nodes, appendix, PBL and lung and can signal through the CCR6 receptor. Recombinant rat MIP-3 α /CCL20 produced in HEK293 cells is a polypeptide chain containing 71 amino acids. A fully biologically active molecule, rrMIP-3 α /CCL20 has a molecular mass of 8.2 kDa analyzed by reducing SDS-PAGE and is obtained by chromatographic techniques at GenScript.
