

PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

Ku-86 (A717) Peptide

Cat No.: BS1497P

Background

The Ku protein is localized in the nucleus and is composed of subunits referred to as Ku-70 (or p70) and Ku-86 (or p86), which is also known by the synonym Ku-80 (or p80). Ku was first described as an autoantigen to which antibodies were produced in a patient with scleroderma-polymyositis overlap syndrome, and was later found in the sera of patients with other rheumatic diseases. Both subunits of the Ku protein have been cloned, and a number of functions have been proposed for Ku, including cell signaling, DNA replication and transcriptional activation.

Swiss-Prot

P13010

Applications

Blocking

Specificity

This peptide can be used with studies using BS1497 Ku-86 (A717) pAb.

Purification & Purity

Synthetic peptide Ku-86 (A717). (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term.

Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.
