

PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

IL-2R α (R264) Peptide

Cat No.: BS1758P

Background

The Interleukin 2 Receptor alpha and beta chains, together with the common gamma chain, constitute the high affinity IL2 receptor present on activated T and B cells, thymocyte subset, pre B cells and T regulatory cells. Homodimeric alpha chains result in low affinity receptor, while homodimeric beta chains produce a medium affinity receptor. Normally an integral membrane protein, soluble IL2 Receptor alpha has been isolated and determined to result from extracellular proteolysis. Alternately spliced IL2 Receptor alpha mRNAs have been isolated, but the significance of each is presently unknown.

Swiss-Prot

P01589

Applications

Blocking

Specificity

This peptide can be used with studies using BS1758 IL-2R α (R264) pAb.

Purification & Purity

Synthetic peptide IL-2R α (R264). (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.
