EAR2 (S40) Peptide

Cat No.: BS1925P

Background

EAR2 (v-erb-a avian erythroblastic leukemia viral oncogene homolog-like 2) protein binds a cis enhancer element (TGACCT motif) upstream of the rennin gene and represses renin gene transcription. EAR2 also contributes to gonadotropin-dependent derepression of LHR promoter activity in granulosa cells. EAR2 mRNA is abundant in the liver, and EAR2 protein localizes to the nucleus of As4.1 cells.

Swiss-Prot

P10588

Applications

Blocking

Specificity

This peptide can be used with studies using BS1925 EAR2 (S40) pAb.

Purification & Purity

Synthetic peptide EAR2 (S40). (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term.

Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.
