

## PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

### GRK 3 (F391) Peptide

Cat No.: BS1985P

#### Background

Heterotrimeric G protein-mediated signal transduction is a dynamically regulated process with the intensity of signal decreasing over time despite the continued presence of the agonist. This phenomenon, referred to as agonist-mediated desensitization, involves phosphorylation of the receptor by two classes of enzymes. The first are the second messenger-regulated kinases such as c-AMP dependent protein kinase A and protein kinase C. The second are the G protein-coupled receptor kinases (GRKs). At least seven members of the GRK family have been identified. These include rhodopsin kinase, GRK 1; two forms of  $\beta$ -adrenergic receptor kinase, GRK 2 ( $\beta$ ARK,  $\beta$ ARK1) and GRK 3 ( $\beta$ ARK2); IT-11 (GRK 4); GRK 5, GRK 6 and GRK 7.

#### Swiss-Prot

P35626

#### Applications

Blocking

#### Specificity

This peptide can be used with studies using BS1985 GRK 3 (F391) pAb.

#### Purification & Purity

Synthetic peptide GRK 3 (F391). (Note: the amino acid sequence is proprietary). The purity is > 98%.

#### Product

1 mg/ml in DI water.

#### Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

#### Research Use

For research use only, not for use in diagnostic procedure.
