

PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

Sox8/9/17/18 (K148) Peptide

Cat No.: BS2481P

Background

Sox genes comprise a family of genes that are related to the mammalian sex determining gene SRY. These genes similarly contain sequences that encode for the HMG-box domain, which is responsible for the sequence-specific DNA-binding activity. Sox genes encode putative transcriptional regulators implicated in the decision of cell fates during development and the control of diverse developmental processes. The highly complex group of Sox genes cluster at a minimum of 40 different loci that rapidly diverged in various animal lineages. At present 30 Sox genes have been identified, and members of this family have been shown to be conserved during evolution and to play key roles during animal development. Some are involved in human diseases, including sex reversal.

Swiss-Prot

P57073/P48436/Q9H6I2/P35713

Applications

Blocking

Specificity

This peptide can be used with studies using BS2481 Sox8/9/17/18 (K148) pAb.

Purification & Purity

Synthetic peptide Sox8/9/17/18 (K148). (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.
