

PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

CAF-1 p60 (W93) Peptide

Cat No.: BS2656P

Background

Chromatin assembly factor-1 (CAF-1) is a multisubunit protein complex that comprises three polypeptide subunits known as p150, p60, and p48. CAF-1 is a nucleosome assembly factor that deposits newly synthesized and acetylated histones H3/H4 into nascent chromatin during DNA replication. The p150 subunit of CAF-1 also supports the maintenance of heterochromatin, which requires the synthesis of both new histones and heterochromatin proteins and their orderly assembly during DNA replication.

Swiss-Prot

Q13112

Applications

Blocking

Specificity

This peptide can be used with studies using BS2656 CAF-1 p60 (W93) pAb.

Purification & Purity

Synthetic peptide CAF-1 p60 (W93). (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.
