

Encephalopsin (F202) polyclonal antibody

Catalog: BS2858

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

Opsins, including Encephalopsin, are members of the superfamily of guanine nucleotide-binding protein (G protein)-coupled receptors, which function through the activation of a G protein and an effector enzyme. Opsin proteins consist of a single polypeptide chain of 340 to 500 amino acids that form 7 alpha-helical transmembrane regions connected by cytoplasmic and extracellular loops.
