

PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

LIR-6 (F83) Peptide

Cat No.: BS3138P

Background

LILRA3 is a member of leukocyte immunoglobulin-like receptor gene family. Leukocyte Ig-like receptors (LIRs) are a family of inhibitory and stimulatory immunoreceptors expressed predominantly on monocytes and B cells and at lower levels on dendritic cells and natural killer (NK) cells. LILRA3 lacks a transmembrane region and may act as a soluble receptor for class I MHC antigens. It is expressed in B-cells, and at lower levels in natural killer (NK) cells.

Swiss-Prot

O75019

Applications

Blocking

Specificity

This peptide can be used with studies using BS3138 LIR-6 (F83) pAb.

Purification & Purity

Synthetic peptide LIR-6 (F83). (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term.

Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.
