Bioworld Technology CO., Ltd.

TESK1 (V217) Peptide

Cat No.: BS3855P

Background

TESK1 (Testis-specific kinase 1) belongs to the serine/threonine protein kinase family. It is a dual specificity protein kinase, catalyzing autophosphorylation and phosphorylation of exogenous substrates on both serine/threonine and tyrosine residues. The testicular germ cell-specific expression and developmental pattern of expression suggests a central role at and after the meiotic phase of spermatogenesis.

Swiss-Prot

Q15569

Applications

Blocking

Specificity

This peptide can be used with studies using BS3855 TESK1 (V217) pAb.

Purification & Purity

Synthetic peptide TESK1 (V217). (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.
