

# GABAA R<sub>β1</sub> (phospho-S434) polyclonal antibody

Catalog: **BS4078**  Host: Rabbit Reactivity: Human, Mouse, Rat

p-GABAA RB1 (S434) polyclonal antibody detects en-

dogenous levels of GABAA Rß1 protein when phosphor-

term. Avoid freeze-thaw cycles.

**Specificity:** 

ylated at Ser434.

**DATA:** 

## **BackGround:**

GAD-65 and GAD-67, glutamate decarboxylases, function to catalyze the production of GABA (gamma-aminobutyric acid). In the central nervous system GABA functions as the main inhibitory transmitter by increasing a Cl- conductance that inhibits neuronal firing. GABA has been shown to activate both ionotropic (GABAA) and metabotropic (GABAB) receptors as well as a third class of receptors called GABAC. Both GABAA and GABAC are ligand-gated ion channels, however, they are structurally and functionally distinct. Members of the GABAA receptor family include GABAA Ral-6, GABAA R Bl-3, GABAA Ryl-3, GABAA Rô, GABAA Rɛ, GABAA Ro1 and GABAA Rp2. The GABAB family is composed of GABAB R1a and GABAB R1B. GABA transporters have also been identified and include GABA T-1, GABA T-2 and GABA T-3 (also designated GAT-1, -2, and -3). The GABA transporters function to terminate GABA action.

#### **Product:**

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

**Molecular Weight:** 

~ 54 kDa

**Swiss-Prot:** 

P18505

**Purification&Purity:** 

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### **Applications:**

WB: 1:500~1:1000

IHC: 1:50~1:200

**Storage&Stability:** 

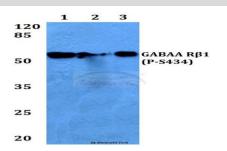

Store at 4 °C short term. Aliquot and store at -20 °C long
