## PRODUCT DATA SHEET

## Bioworld Technology CO., Ltd.

# p-ErbB2/HER2 (Y877) Peptide

**Cat No.:** BS4091P

## **Background**

The EGF receptor family comprises several related receptor tyrosine kinases that are frequently overexpressed in a variety of carcinomas. Members of this receptor family include EGFR (HER1), Neu (ErbB-2, HER2), ErbB-3 (HER3), and ErbB-4 (HER4), which form either homodimers or heterodimers upon ligand binding. Neu, a glycoprotein, undergoes transactivation upon hetero-dimerization with other EGF receptor family members. Neu heterodimerization with ErbB-3 recruits heregulin, which induces phosphoinositide (PI) 3-kinase activation. Activation of Neu potentiates tumor cell motility and protease secretion and invasion, and also modulates cell cycle checkpoint function, DNA repair and apoptotic responses.

#### **Swiss-Prot**

P04626

## **Applications**

**Blocking** 

#### **Specificity**

This peptide can be used with studies using BS4091 p-ErbB2/HER2 (Y877) pAb.

## **Purification & Purity**

Synthetic peptide p-ErbB2/HER2 (Y877). (Note: the amino acid sequence is proprietary). The purity is > 98%.

#### **Product**

1 mg/ml in DI water.

#### **Storage & Stability**

Store at  $4\,\mathrm{C}$  short term. Aliquot and store at  $-20\,\mathrm{C}$  long term. Avoid freeze-thaw cycles.

#### **Research Use**

For research use only, not for use in diagnostic procedure.
