

PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

p-Synuclein- α (S129) Peptide

Cat No.: BS4361P

Background

The synuclein family members, including α -synuclein (also designated NACP for non- β Amyloid component) and β -synuclein, are predominantly expressed in the brain and are speculated to be involved in synaptic regulation and neuronal plasticity. α -synuclein is localized to neuronal cell bodies and synapses. α -synuclein was first identified as a component of Alzheimer's disease amyloid plaques. Abnormal platelet function in Alzheimer's disease has been demonstrated. During megakaryocytic differentiation α -synuclein has been found to be upregulated, while β -synuclein is downregulated, indicating that coordinate expression of synucleins may be important during hematopoietic cell differentiation. A mutant form of α -synuclein has been found in patients with early onset Parkinson's disease.

Swiss-Prot

P37840

Applications

Blocking

Specificity

This peptide can be used with studies using BS4361 p-Synuclein- α (S129) pAb.

Purification & Purity

Synthetic peptide p-Synuclein- α (S129). (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.

Bioworld Technology, Inc.

1660 South Highway 100, Suite 500 St. Louis Park, MN
55416, USA.
