

Profilin 1 Recombinant Rabbit mAb

Catalog: BS45259

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

This gene encodes a member of the profilin family of small actin-binding proteins. The encoded protein plays an important role in actin dynamics by regulating actin polymerization in response to extracellular signals. Deletion of this gene is associated with Miller-Dieker syndrome, and the encoded protein may also play a role in Huntington disease. Multiple pseudogenes of this gene are located on chromosome 1.
