

Ephrin Receptor B1 Recombinant Rabbit mAb

Catalog: BS46341

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Ephrin receptors and their ligands, the ephrins, mediate numerous developmental processes, particularly in the nervous system. Based on their structures and sequence relationships, ephrins are divided into the ephrin-A (EFNA) class, which are anchored to the membrane by a glycosylphosphatidylinositol linkage, and the ephrin-B (EFNB) class, which are transmembrane proteins. The Eph family of receptors are divided into 2 groups based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands. Ephrin receptors make up the largest subgroup of the receptor tyrosine kinase (RTK) family. The protein encoded by this gene is a receptor for ephrin-B family members. [provided by RefSeq, Jul 2008]

Product:

Store at -20 °C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.

Molecular Weight:

135 kDa

Swiss-Prot:

P54762

Purification&Purity:

Affinity Purification

Applications:

WB: 1:1000
IP: 1:20

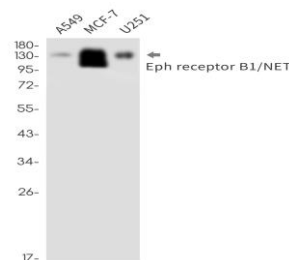

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Isotype:

IgG

DATA:

Western blot detection of Eph receptor B1/NET in A549, MCF-7, U251 cell lysates using Eph receptor B1/NET antibody(1:1000 diluted).

Note:

For research use only, not for use in diagnostic procedure.
