

EYA2 Recombinant Rabbit mAb

Catalog: BS46389

Host: Rabbit

Reactivity: Human

BackGround:

This gene encodes a member of the eyes absent (EYA) family of proteins. The encoded protein may be post-translationally modified and may play a role in eye development. A similar protein in mice can act as a transcriptional activator. Alternative splicing results in multiple transcript variants, but the full-length nature of all of these variants have not yet been determined. [provided by RefSeq, Jul 2009]
