

BS46527

Host:

Rabbit

Catalog:

**BackGround:** 

## **Tissue Factor Pathway Inhibitor Recombinant Rabbit mAb**

Reactivity:

**Purification&Purity:** 

Human

| This gene encodes a Kunitz-type serine protease inhibitor      | Affinity Purification                                                                            |
|----------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| that regulates the tissue factor (TF)-dependent pathway of     | Applications:                                                                                    |
| blood coagulation. The coagulation process initiates with      | WB: 1:1000                                                                                       |
| the formation of a factor VIIa-TF complex, which prote-        | Storage&Stability:                                                                               |
| olytically activates additional proteases (factors IX and      | Store at 4 ${}^\circ\!\!{\rm C}$ short term. Aliquot and store at -20 ${}^\circ\!\!{\rm C}$ long |
| X) and ultimately leads to the formation of a fibrin clot.     | term. Avoid freeze-thaw cycles.                                                                  |
| The product of this gene inhibits the activated factor X       | Isotype:                                                                                         |
| and VIIa-TF proteases in an autoregulatory loop. Inhibi-       | IgG                                                                                              |
| tion of the encoded protein restores hemostasis in animal      | DATA:                                                                                            |
| models of hemophilia. This gene encodes multiple protein       | a 12                                                                                             |
