

HMGCL Recombinant Rabbit mAb

BackGround:WB: 1:1000 >br/sIHC: 1:100The protein encoded by this gene belongs to the HMG-CoA lyase family. It is a mitochondrial enzyme that catalyzes the final step of leucine degradation and plays a key role in ketone body formation. Mutations in this gene are associated with HMG-CoA lyase deficiency. Alterna- tively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq. Oct 2009]Stora at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.Product:IgG DATA:Store at -20 °C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.IgG DATA:Ablecular Weight:Vestern blot detection of HMGCL in Hela cell lysates using HMGCL antibody(1:1000 diluted).Store at -20 °C.Image Stressen	Catalog: BS47199 Host: Rabbit	Reactivity: Human
