

Superoxide Dismutase 1 Recombinant Rabbit mAb

Catalog: BS47291

Host: Rabbit

Reactivity: Human

BackGround:

The protein encoded by this gene binds copper and zinc ions and is one of two isozymes responsible for destroying free superoxide radicals in the body. The encoded isozyme is a soluble cytoplasmic protein, acting as a homodimer to convert naturally-occurring but harmful superoxide radicals to molecular oxygen and hydrogen peroxide. The other isozyme is a mitochondrial protein. Mutations in this gene have been implicated as causes of familial amyotrophic lateral sclerosis. Rare transcript variants have been reported for this gene. [provided by RefSeq, Jul 2008]

Product:

Store at -20 °C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA. Stable for 12 months from date of receipt.

Molecular Weight:

16 kDa

Swiss-Prot:

P00441

Purification&Purity:

Affinity Purification

Applications:

WB: 1:5000-1:20000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Isotype:

IgG

DATA:

Western blot detection of Superoxide Dismutase 1 in K562, HeLa cell lysates using Superoxide Dismutase 1 antibody(1:1000 diluted).

Note:

For research use only, not for use in diagnostic procedure.
