

DRP1 Recombinant Rabbit mAb

Catalog: BS47682 Host: Rabbit	Reactivity: Human, Mouse, Rat
This gene encodes a member of the dynamin family. The encoded protein is localized to the cytoplasm and mito- chondrial membrane, is involved in mitochondrial and peroxisomal division, and is essential for mitochondrial fission. Alternative splicing results in multiple transcript variants. A related pseudogene has been identified on chromosome 2. [provided by RefSeq, Feb 2013]Image: Comparison of the dynamin family.
