

## **Orai1 Recombinant Rabbit mAb**

| Catalog:   | BS47737                      | Host:        | Rabbit      | Reactivity: Human   |        |  |
|--|------------------------------|--------------|-------------|---|--------|--|
| <b>BackGround:</b><br>The protein encoded by this gene is a membrane calcium channel subunit that is activated by the calcium sensor STIM1 when calcium stores are depleted. This type of channel is the primary way for calcium influx into T-cells. Defects in this gene are a cause of immune dysfunction with T-cell inactivation due to calcium entry defect type 1 |                              |              |             | Purification&Purity:Affinity PurificationApplications:WB: 1:1000-1:5000Storage&Stability:Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles. |        |  |
