

alpha Lactalbumin Recombinant Rabbit mAb

Catalog:	BS48262	Host:	Rabbit	Reactivity:	Human
Catalog: BS48262 Host: Rabbit BackGround: This gene encodes alpha-lactalbumin, a principal protein of milk. Alpha-lactalbumin forms the regulatory subunit of the lactose synthase (LS) heterodimer and beta 1,4-galactosyltransferase (beta4Gal-T1) forms the cata- lytic component. Together, these proteins enable LS to produce lactose by transfering galactose moieties to glu- cose. As a monomer, alpha-lactalbumin strongly binds calcium and zinc ions and may possess bactericidal or an- titumor activity. A folding variant of alpha-lactalbumin, called HAMLET, likely induces apoptosis in tumor and			cipal protein atory subunit er and beta ms the cata- enable LS to	Reactivity: Swiss-Prot: P00709 Purification&Purity Affinity Purification Applications: WB: 1:1000-1:5000
