| It has been suggested that this protein may be involved in | | | | Applications: | |
| the induction of apoptosis as it preferentially recognizes poly(A) homopolymers and induces DNA fragmentation in CTL targets. The major granule-associated species is a 15-kDa protein that is thought to be derived from the carboxyl terminus of the 40-kDa product by proteolytic processing. Alternative splicing resulting in different isoforms has been found for this gene. [provided by Ref- Seq, May 2017] | | | y recognizes | WB: 1:1000 IH0 | C: 1:500 FC: 1:50 IP: |
