

## SV40 Large T Antigen Recombinant Rabbit mAb

Catalog: BS49282

Host: Rabbit

Reactivity: Virus

### BackGround:

Isoform large T antigen is a key early protein essential for both driving viral replication and inducing cellular transformation. Plays a role in viral genome replication by driving entry of quiescent cells into the cell cycle and by autoregulating the synthesis of viral early mRNA. Displays highly oncogenic activities by corrupting the host cellular checkpoint mechanisms that guard cell division and the transcription, replication, and repair of DNA.
