

**IL-27RA Recombinant Rabbit mAb**

Catalog: BS49599

Host: Rabbit

Reactivity: Mouse

BackGround:

Enables interleukin-27 receptor activity. Involved in negative regulation of T cell extravasation; negative regulation of T-helper 17 type immune response; and negative regulation of cytokine production. Acts upstream of or within several processes, including defense response to Gram-positive bacterium; positive regulation of interferon-gamma production; and regulation of adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains. Predicted to be located in cytoplasm; extracellular region; and plasma membrane. Predicted to be part of interleukin-12 receptor complex and interleukin-23 receptor complex. Predicted to be active in external side of plasma membrane. Is expressed in decidua; decidua basalis; embryo; and extraembryonic component. Orthologous to human IL27RA (interleukin 27 receptor subunit alpha). [provided by Alliance of Genome Resources, Apr 2022]

Product:

Store at -20 °C. Supplied in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and

0.05% BSA. Stable for 12 months from date of receipt.

Molecular Weight:

100-120 kDa

Swiss-Prot:

O70394

Purification&Purity:

Affinity Purification

Applications:

WB: 1:1000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Isotype:

IgG

DATA:**Note:**

For research use only, not for use in diagnostic procedure.
