

## PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

### p-AKT (Y326) Peptide

Cat No.: BS5050P

#### Background

AKT, also known as protein kinase B (PKB), is a 57 kDa serine/threonine protein kinase. There are three mammalian isoforms of Akt: AKT1 (PKB alpha), AKT2 (PKB beta) and AKT3 (PKB gamma) with AKT2 and AKT3 being approximately 82% identical with the AKT1 isoform. Each isoform has a pleckstrin homology (PH) domain, a kinase domain and a carboxy terminal regulatory domain. AKT was originally cloned from the retrovirus AKT8, and is a key regulator of many signal transduction pathways. Its tight control over cell proliferation and cell viability are manifold; overexpression or inappropriate activation of AKT has been seen in many types of cancer.

#### Swiss-Prot

P31749/P31751/Q9Y243

#### Applications

Blocking

#### Specificity

This peptide can be used with studies using BS5050 p-AKT (Y326) pAb.

#### Purification & Purity

Synthetic peptide p-AKT (Y326). (Note: the amino acid sequence is proprietary). The purity is > 98%.

#### Product

1 mg/ml in DI water.

#### Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

#### Research Use

For research use only, not for use in diagnostic procedure.
