

## PGRMC2 polyclonal antibody

Catalog: BS5853

Host: Rabbit

Reactivity: Human, Mouse, Rat

### BackGround:

PGRMC2 (progesterone receptor membrane component 2), also known as DG6 (steroid receptor protein DG6) or PMBP (progesterone membrane-binding protein), is a single pass membrane protein belonging to the cytochrome b5 family (MAPR (membrane associated progesterone receptor) subfamily). Expressed in sperm, PGRMC2 is believed to function as a steroid receptor and may participate in the progesterone-dependent sperm acrosome reaction. PGRMC2 shares approximately 50% overall sequence identity with its close relative PGRMC1. The loss of the gene encoding PGRMC2 is associated with metastasis in uterine endocervical adenocarcinomas, implicating a potential role of PGRMC2 in the suppression of metastasis of endocervical adenocarcinomas.

### Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

### Molecular Weight:

~ 24 kDa

### Swiss-Prot:

O15173

### Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB: 1:500~1:1000

ICC: 1:50~1:200

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Specificity:

PGRMC2 polyclonal antibody detects endogenous levels of PGRMC2 protein.

### DATA:

Western blot (WB) analysis of PGRMC2 polyclonal antibody at 1:500 dilution

Lane1:Hela cell lysate

Lane2:H9C2 cell lysate

Lane3:Rat brain tissue lysate

### Note:

For research use only, not for use in diagnostic procedure.
