

## PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

### PPP1R19 Peptide

Cat No.: BS5913P

#### Background

PPP1R19, also known as RMP (RPB5-mediating protein), C19orf2, NNX3 or URI, is a 534 amino acid protein that localizes to the nucleus and belongs to the RNA polymerase II subunit 5-mediating protein family. Expressed ubiquitously, RMP functions as a component of the multi-protein URI complex and is thought to play a role in protein scaffolding that may be involved in transcription and ubiquitination. Multiple isoforms of RMP exist due to alternative splicing events. The gene encoding RMP maps to human chromosome 19, which consists of over 63 million bases, houses approximately 1,400 genes and is recognized for having the greatest gene density of the human chromosomes.

#### Swiss-Prot

O94763

#### Applications

Blocking

#### Specificity

This peptide can be used with studies using BS5913 PPP1R19 pAb.

#### Purification & Purity

Synthetic peptide PPP1R19. (Note: the amino acid sequence is proprietary). The purity is > 98%.

#### Product

1 mg/ml in DI water.

#### Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

#### Research Use

For research use only, not for use in diagnostic procedure.
