

# PRODUCT DATA SHEET

Bioworld Technology,Inc.

# Kv7.1 polyclonal antibody

Catalog: BS60208 Host: Rabbit Reactivity: Human, Mouse, Rat

#### **BackGround:**

Voltage-gated K+ channels in the plasma membrane control the repolarization and the frequency of action potentials in neurons, muscles and other excitable cells. A specific K+ channel, comprised of an α subunit KCNQ1 and a β subunit KCNE1, a small protein which spans the membrane only once, is predominantly expressed in the heart and in the cochlea, and is responsible for regulating the slow, depolarization-activated potassium current. Mutations in the genes encoding for KCNQ1 and KCNE1 lead to cardiac disease because they directly impair electrical signaling, and mutations in KCNQ4 are implicated in the onset of deafness. KCNQ proteins, including KCNQ1 and KCNQ4, characteristically contain six transmembrane domains and function as tetramers. KCNQ4 forms heteromeric channels with KCNQ3 and is expressed in several tissues, including the cochlea, where it is present in outer hair cells.

#### **Product:**

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

## **Molecular Weight:**

~ 75 kDa

#### **Swiss-Prot:**

P51787

#### **Purification&Purity:**

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

# **Applications:**

WB: 1:500~1:1000

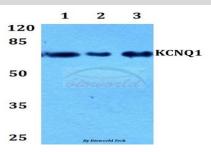

# Storage&Stability:

Store at  $4\,\mathrm{C}$  short term. Aliquot and store at  $-20\,\mathrm{C}$  long term. Avoid freeze-thaw cycles.

#### **Specificity:**

Kv7.1 polyclonal antibody detects endogenous levels of Kv7.1 protein.

## **DATA:**

Western blot (WB) analysis of Kv7.1 polyclonal antibody at 1:500 dilu-

Lane1:DLD whole cell lysate

Lane2:Mouse brain tissue lysate

Lane3:Rat brain tissue lysate

#### Note:

For research use only, not for use in diagnostic procedure.
