

PRODUCT DATA SHEET

Bioworld Technology CO., Ltd.

GDF-1 Peptide

Cat No.: BS60398P

Background

Growth/differentiation factors (GDFs) are members of the TGF β superfamily. Members of the TGF β superfamily are involved in embryonic development and adult tissue homeostasis. GDF-1 expression is almost exclusively restricted to the central nervous system, most strongly expressed in the hippocampus and cortex of the brain. The function of GDF-1 is not completely known, however, it may mediate cell differentiation events during embryonic development.

Swiss-Prot

P27539

Applications

Blocking

Specificity

This peptide can be used with studies using BS60398 GDF-1 pAb.

Purification & Purity

Synthetic peptide GDF-1. (Note: the amino acid sequence is proprietary). The purity is > 98%.

Product

1 mg/ml in DI water.

Storage & Stability

Store at 4 °C short term. Aliquot and store at -20 °C long term.

Avoid freeze-thaw cycles.

Research Use

For research use only, not for use in diagnostic procedure.
