

RCL polyclonal antibody

Catalog: BS65327

Host: Rabbit

Reactivity: Human

BackGround:

2'-deoxynucleoside 5'-phosphate N-hydrolase 1(DNPH1) Homo sapiens This gene was identified on the basis of its stimulation by c-Myc protein. The latter is a transcription factor that participates in the regulation of cell proliferation, differentiation, and apoptosis. The exact function of this gene is not known but studies in rat suggest a role in cellular proliferation and c-Myc-mediated transformation. Two alternative transcripts encoding different proteins have been described. [provided by RefSeq, Jul 2008],
