

## LIM2 polyclonal antibody

Catalog: BS70987

Host: Rabbit

Reactivity: Human, Mouse, Rat

### BackGround:

This gene encodes an eye lens-specific protein found at the junctions of lens fiber cells, where it may contribute to cell junctional organization. It acts as a receptor for calmodulin, and may play an important role in both lens development and cataractogenesis. Mutations in this gene have been associated with cataract formation. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
