

PRODUCT DATA SHEET

Bioworld Technology,Inc.

Nephrin polyclonal antibody

Catalog: BS7174 Host: Rabbit Reactivity: Human, Mouse, Rat

BackGround:

Nephrin is a member of the immunoglobulin family of cell adhesion molecules that localizes to opposing sites of the secondary foot processes formed by podocytes, a specialized epithelial cell that ensures size- and charge-selective ultrafiltration. The human nephrin gene maps to chromosome 19q13.1 and encodes a 1,241 amino acid protein that contains a transmembrane domain, 8 Ig-like modules, and 1 fibronectin III-like module. Nephrin is expressed in embryonic and adult kidneys and localizes to glomerular podocytes and the glomerular slit diaphragm. Nephrin stimulates mitogen-activated protein kinases and is enhanced by podocin, which binds to the cytoplasmic tail of nephrin.

Product:

1mg/ml in PBS with 0.1% Sodium Azide, 50% Glycerol.

Molecular Weight:

~ 135 kDa

Swiss-Prot:

O60500

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB 1:500 - 1:2000

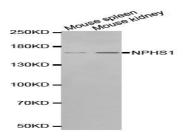

Storage&Stability:

Store at $4\,\mathrm{C}$ short term. Aliquot and store at -20 C long term. Avoid freeze-thaw cycles.

Specificity:

Nephrin polyclonal antibody detects endogenous levels of Nephrin protein.

DATA:

Western blot analysis of Nephrin polyclonal antibody

Note:

For research use only, not for use in diagnostic procedure.
