

## LTBP3 polyclonal antibody

Catalog: BS72733

Host: Rabbit

Reactivity: Human

### BackGround:

The protein encoded by this gene forms a complex with transforming growth factor beta (TGF-beta) proteins and may be involved in their subcellular localization. Activation of this complex requires removal of the encoded binding protein. This protein also may play a structural role in the extracellular matrix. Three transcript variants encoding different isoforms have been found for this gene.
