

Thioredoxin 1 (Trx1/TXN) polyclonal antibody

Catalog: BS75956

Host: Rabbit

Reactivity: Human, Mouse, Rat

Background:

The protein encoded by this gene acts as a homodimer and is involved in many redox reactions. The encoded protein is active in the reversible S-nitrosylation of cysteines in certain proteins, which is part of the response to intracellular nitric oxide. This protein is found in the cytoplasm. Two transcript variants encoding different isoforms have been found for this gene.
