

PHF10 polyclonal antibody

Catalog: BS76326

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

This gene contains a predicted ORF that encodes a protein with two zinc finger domains. The function of the encoded protein is not known. Sequence analysis suggests that multiple alternatively spliced transcript variants are derived from this gene but the full-length nature of only two of them is known. These two splice variants encode different isoforms. A pseudogene for this gene is located on Xq28.
