

**CDT1 polyclonal antibody**

Catalog: BS76861

Host: Rabbit

Reactivity: Mouse

BackGround:

The protein encoded by this gene is involved in the formation of the pre-replication complex that is necessary for DNA replication. The encoded protein can bind geminin, which prevents replication and may function to prevent this protein from initiating replication at inappropriate origins. Phosphorylation of this protein by cyclin A-dependent kinases results in degradation of the protein.
