

SOX11 polyclonal antibody

Catalog: BS77567

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

This intronless gene encodes a member of the SOX (SRY-related HMG-box) family of transcription factors involved in the regulation of embryonic development and in the determination of the cell fate. The encoded protein may act as a transcriptional regulator after forming a protein complex with other proteins. The protein may function in the developing nervous system and play a role in tumorigenesis.
