

**PIEZO2 polyclonal antibody**

Catalog: BS77965

Host: Rabbit

Reactivity: Human

BackGround:

The protein encoded by this gene contains more than thirty transmembrane domains and likely functions as part of mechanically-activated (MA) cation channels. These channels serve to connect mechanical forces to biological signals. The encoded protein quickly adapts MA currents in somatosensory neurons. Defects in this gene are a cause of type 5 distal arthrogyriposis. Several alternatively spliced transcript variants of this gene have been described, but their full-length nature is not known.
