

SSTR4 polyclonal antibody

Catalog: BS8631

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Somatostatin acts at many sites to inhibit the release of many hormones and other secretory proteins. The biologic effects of somatostatin are probably mediated by a family of G protein-coupled receptors that are expressed in a tissue-specific manner. SSTR4 is a member of the superfamily of receptors having seven transmembrane segments and is expressed in highest levels in fetal and adult brain and lung.
