

Caspase-6 p18 polyclonal antibody

Catalog: BS90189

Host: Rabbit

Reactivity: Human

BackGround:

A unique family of cysteine proteases has been described that differs in sequence, structure and substrate specificity from any previously described protease family. This family, Ced-3/caspase-1, is comprised of caspase-1, caspase-2, caspase-3, caspase-4, caspase-6, caspase-7 (also designated Mch3, ICE-LAP3 or CMH-1), caspase-9 and caspase-10. Ced-3/caspase-1 family members function as key components of the apoptotic machinery and act to destroy specific target proteins which are critical to cellular longevity. Poly(ADP-ribose) polymerase plays an integral role in surveying for DNA mutations and double strand breaks. Caspase-3, caspase-7 and caspase-9, but not caspase-1, have been shown to cleave the nuclear protein PARP into an apoptotic fragment. Caspase-6, but not caspase-3, has been shown to cleave the nuclear lamins which are critical to maintaining the integrity of the nuclear envelope and cellular morphology. Caspase-10 has been shown to activate caspase-3 and caspase-7 in response to apoptotic stimuli.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

18/33 kDa

Swiss-Prot:

P55212(Human)

Purification&Purity:

ProA affinity purified

Applications:

WB:1:1,000-1:5,000

Storage&Stability:

Store at +4 °C after thawing. Aliquot store at -20 °C or -80 °C. Avoid repeated freeze / thaw cycles.

Specificity:

Caspase-6 p18 polyclonal antibody detects endogenous levels of Caspase-6 p18 protein.

DATA:

Western blot analysis of Caspase-6 p18 on U937 cells lysates using anti-Caspase-6 p18 antibody at 1/1,000 dilution.

Note:

For research use only, not for use in diagnostic procedure.
