

FosB polyclonal antibody

Catalog: BS90524

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

The v-Fos oncogene was initially identified as the transforming gene of two independent murine osteosarcoma virus isolates and an avian nephroblastoma virus. The cellular homolog, c-Fos, encodes a nuclear phosphoprotein that is rapidly and transiently induced by a variety of agents and functions as a transcriptional regulator for several genes. In contrast to c-Jun proteins, which form homo- and heterodimers which bind to specific DNA TPA response elements (TREs), c-Fos proteins are only active as heterodimers with members of the Jun gene family. Murine Fos B encodes a nuclear protein of 338 amino acids which has 70% homology with c-Fos, exhibits similar kinetics of expression as c-Fos and forms heterodimers with both c-Jun and Jun B which bind to TRE DNA response elements. Functional homologs of c-Fos and Fos B include Fra-1 and Fra-2 genes.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

48 kDa

Swiss-Prot:

P53539(Human) P13346(Mouse) En-
trezGene:100360880(Rat)

Purification&Purity:

ProA affinity purified

Applications:

WB:1:1,000

ICC:1:50-1:200

IHC:1:50-1:200

Storage&Stability:

Store at +4 °C after thawing. Aliquot store at -20 °C or -80 °C. Avoid repeated freeze / thaw cycles.

Specificity:

FosB polyclonal antibody detects endogenous levels of FosB protein.

DATA:

Western blot analysis of FosB on human liver lysates using anti-FosB antibody at 1/1,000 dilution.

Immunohistochemical analysis of paraffin-embedded rat spleen tissue using anti-FosB antibody. Counter stained with hematoxylin.

Note:

For research use only, not for use in diagnostic procedure.
