

GPX1 polyclonal antibody

Catalog: BS90594

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Glutathione peroxidase (GPx) enzymes are generally selenium-containing tetrameric glycoproteins that help prevent lipid peroxidation of cell membranes. GPx enzymes reduce lipid hydroperoxides to alcohols, and reduce free hydrogen peroxide to water. GPx members are among the few proteins known in higher vertebrates to contain selenocysteine, which occurs at the active site of glutathione peroxidase and is coded by the nonsense (stop) codon TGA. There are eight GPx homologs (GPx-1-8). GPx-1, Gpx-2 and Gpx-3 exist as homotetramers. Gpx-4 has a high tendency to form high molecular weight oligomers. GPx-1 plays an important role in the antioxidant defense of the vascular wall and neural cells in response to oxidative stress. GPx-2 is the major isoform in the lungs and its basal or inducible expression is dependent on Nrf2. GPx-3 is under regulation by hypoxic stress and the expression and deficiency of GPx-3 is associated with cardiovascular disease and stroke. GPx-5 is selenium-independent; it is bound to the acrosome of sperm, where it may protect sperm from premature acrosome reaction in the epididymis.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

22 kDa

Swiss-Prot:

P07203(Human) P11352(Mouse) P04041(Rat)

Purification&Purity:

ProA affinity purified

Applications:

WB:1:1,000-1:2,000

Storage&Stability:

Store at +4 °C after thawing. Aliquot store at -20 °C or -80 °C. Avoid repeated freeze / thaw cycles.

Specificity:

GPX1 polyclonal antibody detects endogenous levels of GPX1 protein.

DATA:

Western blot analysis of Glutathione Peroxidase 1 on different lysates using anti-Glutathione Peroxidase 1 antibody at 1/1,000 dilution. Positive control: Lane 1: HepG2 Lane 2: THP-1

Note:

For research use only, not for use in diagnostic procedure.
